

Toby McGrail (left) and Michael Risser collected the Award.

Product of the Year • Hardware Nominees - Door

Precision Collection Frank Allart & Co Inc

The Frank Allart Precision Collection is a standard customizable door, window, and cabinet Hardware Collection. It has eight different texture options including: Smooth, Diamond Knurl, Diamond Mesh, Linear, Spiral/Starburst, Rotor, Groove, and Square Mesh. Mix and match the textures, designs, sizes and finishes in this collection to create a personal combination with more than 50 million different standard options!

Having the ability to choose from over 50 million standard options makes it easier for the designer/end user to choose from without having to worry about design or customization fees. Suite the design across the whole project since there are options for cabinet, entry door, interior door, millwork, and window hardware. Each design has many functionality options that can fit any preexisting project condition. Several designs can mix finishes to really make the textured design pop. For example, the textured grips on the levers can be in one finish while the ends and the base of the lever in another finish. There are even garment/valet rod options in this collection in each textured design.
