FRANK ALLART

Cabinet Knobs & Pulls

2020 Edition

Makers of fine English hardware since 1914.

Frank Allart & Company was founded in 1914 by George Allart (Frank's father) and started life in Birmingham, England – 'the city of a thousand trades' as it was known back then.

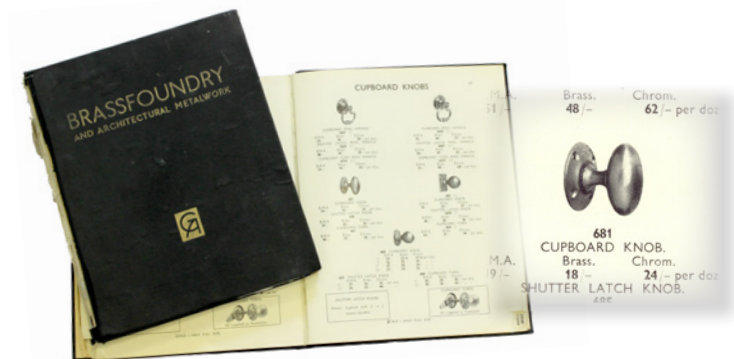

After establishing themselves as general patternmakers, they quickly built up a reputation for high-class brassfoundry serving the architectural, cabinetry, marine and railway trades.

Today, still based in the heart of Birmingham but operating from a modern, purpose built facility, Frank Allart still design, develop, and manufacture some of the very best architectural quality door, window, and cabinet hardware available.

It has been described as 'jewellery for the home' and can be found adorning prestigious homes, luxury hotels, and historic buildings around the world.

This booklet focuses on our extensive selection of cabinet knobs and pulls. Our cabinet knobs are now offered with a choice of different rosette combinations to provide design flexibility. This also affords the specifier the opportunity to mix finishes between knob & rosette and create a truly unique and individual aesthetic.

Available in over 30 different finishes and patinas, our cabinet furniture is designed to complement our full range of door & window furniture; details of which can be found on our website www.frankallart.com

We've been manufacturing cupboard knobs for over a century, as seen here in one of the very early George Allart catalogues.

Metal Finishes & Patinas

All of our finishes and patinas are skillfully created and applied by our experienced and committed craftspeople to the highest possible standards to meet the aspirations of today's discerning customer.

Colour and texture variation is inherent in the creation of hand finished patinas and once installed, touch, time and environment should lead to gradual wear and oxidization, lending character and elegance.
